

(Note: Please read left to right, up to down)

① Create new branch with your name

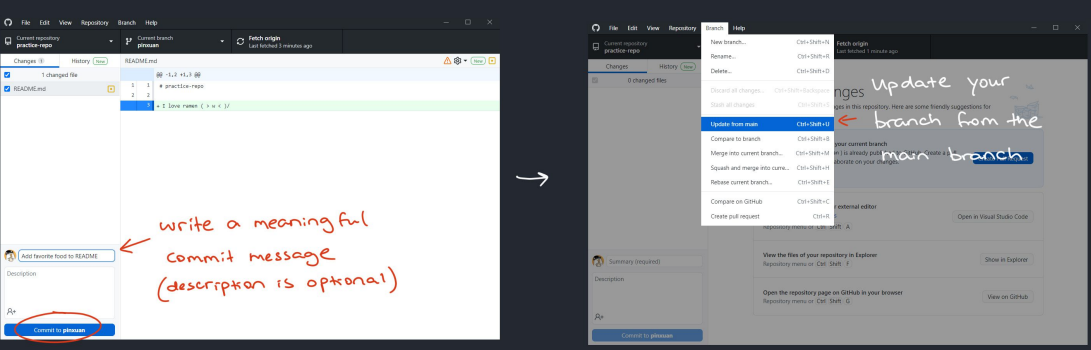

② Open repository folder in code editor (VS code / IntelliJ / etc...)

Add your favorite food in the README.md file

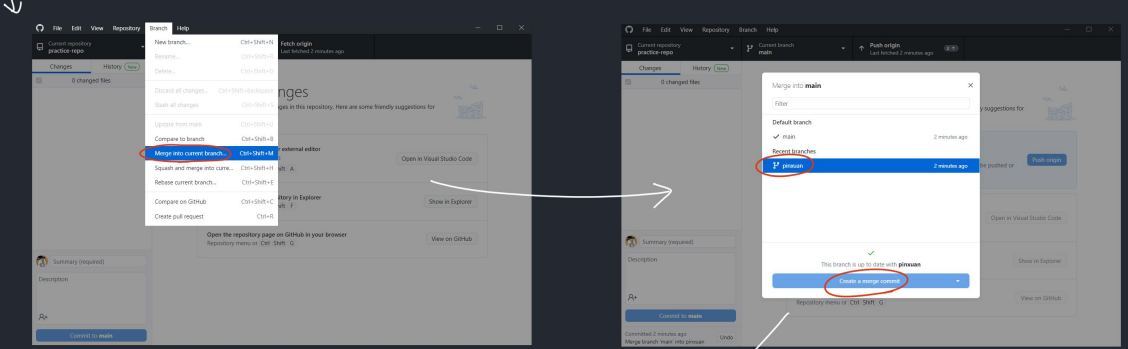

③ Commit your changes then pull changes from the main branch

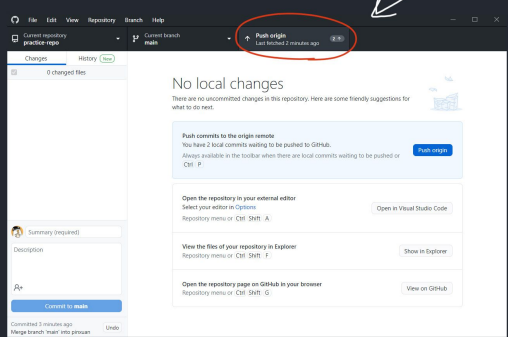

Update your branch from the main branch

Write a meaningful commit message (description is optional)

④ Change to the main branch then merge your branch into the current branch

⑤ Finally push to origin

Good Job!! You're done
